2022 Core Values

Rating Scale

Score	Rating	Description
5	5 - Exceeds Expectations	Is self-directed, works independently with minimal coaching, routinely performs well beyond maximum level of proficiency or competence, consistently exceeds performance expectations in quality and timeliness
4	4 - Meets and Sometimes Exceeds Expectations	Frequently exceeds or performs at expectation, occasionally surpasses maximum level of proficiency or competence, quality and timeliness, requires occasional direction or coaching
3	3 - Meets Expectations	Produces acceptable work products, performs at expected level of proficiency or competence and timeliness, requires some direction and coaching, may need help assigning the correct priorities and determining right course of action
2	2 - Needs Improvement	Performance is usually at or meets job requirements, however the need for further development and improvement is clear, requires more than normal time to coach and correct work, either does not complete assignments, or completes assignments, but cannot be relied upon to complete them with acceptable quality, on time and/or without significant rework
1	1 - Does Not Meet Expectations	Developmental approaches have been utilized without success, employee is either unwilling or unable to do the job, performance must significantly and immediately improve with sustained and continuous improvement

Dedication - We are passionate and committed to our work. We go above and beyond and do whatever it takes to exceed customer expectations. Related Fundamentals: (1) Provide a genuine and warm greeting, (3) Furnish the customer (or coworker) with a solution, (12) Do what is best for the customer (or coworker), (23) Invest in relationships and (24) Do Whatever It Takes

Comments

Justin Pope (Self) :

- Development of customer software and intergerations
- + This is my primary job function and what my responsibilities are
 - > Talend process
 - X SugarCRM
 - X Snowflake
 - > SQL maintainance
 - X Have been able to manage SQL errors from being on call
 - > Help develop code base standards
- Support of exisiting applications and integrations
- + Have supported Meagan with SugarCRM integrations and manage the data feed
- + Have supported David Sowell and Raghu with integrations to Snowflake
- Documenting software and integrations
- + Documented SugarCRM integration as a whole
- + more documents in progress to be published

Cather Cheese (Manager) :

- Development of custom software and integrations -- This quarter Justin closed 32 production task and 23 of these task involved change controls promotions which is 72 % percent overall performance in developing and modifying software and integrations. The majority of Justin work would be defined as Major code changes since 14 of the 23 change controls promotions total 61% of his work effort this quarter.
-
- Support of existing applications and integrations -- Justin is on-call once every 5 weeks and support job errors and/or application errors. He also support changes to Talend and SugarCRM
-

- Documenting software and integrations -- Justin completed technical documentation for SugarCRM
-

I currently don't have any roles listed on the Accountability chart. I have been able to complete several tickets and learn processes that will be my primary job responsibility.

I have also meet the challenge for the Split Shipping project.

I believe that I am meeting expectations and will be able to fully grasp my role in the coming quarter.

Comments

Justin Pope (Self) :

Benchmark Estimate

- I still need to work on the project management portion of my job and managing my time.

Production Accuracy

- I believe I was meet expectations on this metric as most of my deployments were good with few errors

Cather Cheese (Manager) :

Benchmark Estimate -- The goal is to score 80 points within the quarter. Justin scored 35 points which is only 43% , this needs to improve concerning a benchmark estimate should be completed on 50% of the developer workload, which would have been 80 points, this is also due to the team lost two resource during this quarter which left Justin with supporting Talend with little knowledge and he needed to focus on learning this tool to support our integrations for Snowflake and SugarCRM

Production Accuracy -- The goal for the quarter is to score 85%. Justin score 150%, this exceeds expectations

Comments

Justin Pope (Self) :

SugarCRM Open Order Project (SDM:24497) | Not Finished

+ Sugar development was unsteady as priorities were constantly changing

+ As of the end of the quarter solid priorities were able to be established and executed on. Developments will be

completed next quarter.

New eCat fields order import changes and export to CSV functionality | Marked Finished

+ eCat fields on order import were deployed and completed

+ CSV functionality was deemed 'not attainable'

SmartyStreets address verification changes to eCat import and export | Not Finished

+ development on this was not able to be completed.

+ SmartyStreets changes were made and requirements are able to be established

Syspro Upgrade Support | On Going

+ Support was provided

+ Syspro v8 was not able to be made this quarter

Talend Learning | Marked Finished

+ Completed this rock and fully got up to speed with Talend development

Cather Cheese (Manager) :

SugarCRM Open Order Project (SDM:24497) | Not Finished

+ The priorities changes on Sugar through the quarter, but Justin meet the expectations of the business user for SugarCRM

New eCat fields order import changes and export to CSV functionality | Marked Finished

+ the task that was defined was completed

SmartyStreets address verification changes to eCat import and export | Not Finished

+ This task was waiting on Syspro to complete there part, so it was moved to next quarter

Syspro Upgrade Support | Completed

+ Syspro support was completed but additional issue found in testing which caused the project to be delayed to next quarter

Talend Learning | Marked Finished

+ Completed and did a great job on documentation

No Rocks were given to me this quarter. Rocks will be assigned next quarter.

Cather Cheese (Manager)

Rated : 3 - 3 - Meets Expectations - **Review :** 2Q2022 Quarterly Conversation - **Date :** 6/6/2022

No ROCKS, new employee

2022 Performance Summary

Strengths and Key Accomplishments - examples of achievements from the review period such as WIT moments, committee involvement, additional projects, cross-functional team assistance, new skills learned, your reasons to celebrate in the review period

Comments

Justin Pope (Self) :

I have been able to establish myself as a key member to this team and be expert in areas of the business. Areas of expertise:

- > Talend
- > SugarCRM
- > Snowflake integrations
- > SQL Server management
 - Table, Procedure and function development and management
 - On call responsibilities

Cather Cheese (Manager) :

Justin has proven himself to be an owner of his work. He jumped right in with the task of learning Talend and SugarCRM, now he is the go to person for these applications. Justin is a great team player and has a positive attitude. He has become a go to person for me to bounce ideas off of and help structure some of our processes on the development team. He is organized and writes neat, clean, and readable code. He prides himself with getting it right the first time.

Most of the work that I have done in this quarter was learning the different processes that I will need to know.

Processes:

- 1) eCat export 2) Sugar export 3) Syspro Service and Business Object APIs

Cather Cheese (Manager)

Review : 2Q2022 Quarterly Conversation - **Date :** 6/6/2022

Very strong developer and excellent analytical skills.

Key Accomplishments --- Freight and Surcharge splitting.

Do you Get It, Want It, and Have the Capacity to Do It? Does the employee understand the responsibilities of the position, the culture, the systems, the pace, how the job comes together, and possess the aptitude, natural ability and understanding of the ins and outs of the job? Does the employee genuinely like the position, appreciate working for the company in the position and sincerely want to do the duties required of the position? Does the employee have the time as well as the mental, physical and emotional capacity to do the job well, with or without reasonable accommodation?

Comments

Justin Pope (Self) :

Get It: I am fully on board with my position and responsibilities here and Gabreille White. I am a good fit for this company and the team I am with.

Want It: I enjoy the system development and technology that I am working with.

Have the Capacity to Do It: I have the capacity to do the job.

Cather Cheese (Manager) :

Yes, Justin get the job and understands the culture and expectations of his job to perform well. He is capable, and has exceeded the expectation is a short period of time. He want the job and has proven it by stepping up to the challenges the time faced with losing two resources in the same quarter

Get It: I am still getting familiar with the company processes and what my position is responsible for.

Want It: I do want this. The company is showing care and effort for the individual employee. I value and appreciate that the company is doing this. I want to be able to be a valuable membor of the group here at Gabriella White.

Have the Capacity to Do It: I am still on the learning curve and still getting to know the company and people here, but I am more than willing and able to do the job that is required.

Cather Cheese (Manager)

Review : 2Q2022 Quarterly Conversation - **Date :** 6/6/2022

Yes Justin has learned the business quickly, He is passion about his job, he has the abiltiy to do it.

Plan to get on track - reflect on what did not go as planned and how you intend on getting these items back on track. i.e., rocks, other projects, attendance issues, organization, communication, production or quality results. Provide ideas, tools and/or resources to address these issues for improvement and be SMART in providing the plan to improve.

Comments

Justin Pope (Self) :

Project Management

It was too easy to dive into development and start makeing changes before outlining what is needed and documentation. Taking a step back from systems and take the time to get and document requirements is what I am going to work on before development.

Cather Cheese (Manager) :

Justin wants to get it all completed and right all at one time, which is great but this method can introduce chaos and stress. This quarter for Justin to get back on track he needs to stay focus on the priorities, taking the time to plan and assess his assignments, outline the work in the form of a technical documentations and follow the task thru to completion. Try not to tackle too many task at one time.

Cather will work with him during our one/one to set priorities for the week so those priorities will remain the same until they are completed. The team has started having some development sessions which will help structure the team to get consistence at our process, in return will help Justin to write flexible code and less maintenance of existing code. I believe this will help improve the “jumping” from task to task without getting results. Results defined as completion of the task in a timely manner .

The Freight and Surcharge Split Ship project was not handled with great effeciency. I believe I can do better with managing comminications with stakeholders.

Cather Cheese (Manager)

Review : 2Q2022 Quarterly Conversation - **Date :** 6/6/2022

Focus on ROCKS, Talend training/learning, take a digger dive into Sugar.

Growth and Development – specific areas where growth and development can be increased to improve performance and provide progression in current position or future career pathing - i.e., additional training such as an LMS course, a certification or license, cross-training or professional development course, etc.
